Foundation On Seniors' Side

Discover what has happened
and what will happen in the
Foundation!

WHAT IS THE NEWS ?

- **Back to the Human Days**

On the occasion of the Quality of Life at Work week, Damart France invited us to present the foundation and its projects.

We were able to highlight the employees invested in the Foundation. Whether they are project sponsors or members of the steering committee, they shared their experience with the Foundation and the associations they support.

The DUO for a Job charity also took part in the event, with a presentation of the charity and a poignant testimony from a duo! (NB: The charity offers intergenerational mentoring between people aged 55 and over and young people from diverse backgrounds).

A Fashion Show with Ensemble 2 Générations

At the beginning of April, the Damart shop in Lille organised a Fashion Show to present the new collection to the customers. During this event, the shop's team invited the charity Ensemble 2 Générations, with which it has a partnership. It was an opportunity for the

director of the association to present the charity to the customers and maybe recruit potential seniors to make intergenerational roommates!

As a reminder, Ensemble 2 Générations offers students the opportunity to share a flat with senior citizens in order to benefit from cheaper accommodation. This allows the seniors to benefit from a daily presence while having help at home.

- **Bowling pros on Wii Sport?**

The Silver Geek charity is organising a Trophée des Seniors for an eSport competition. During 3 months, competitions are organised to find the best team from each region of France.

During the week of May 13th, the charity will find the finalist team from Hauts-de-France who will compete in the final in autumn. The teams will compete on Wii

Sport Bowling and will try to make the most strikes to win the competition.

Several Damart employees will accompany the sponsor of the project. See you next month for more details!

SEEKING SPONSORS FOR BELGIAN PROJECTS

LA MAISONNÉE ASBL : A residential service for adults with moderate mental disabilities

The project is to set up a Snoezelen space within their institution. It is a relaxation area that promotes the well-being of residents by reducing their anxiety and frustrations due to their disability.

1 toit 2 âges : An charity that breaks the loneliness of senior citizens by offering intergenerational shared accommodation.

The charity wants to develop the «Job' services» initiative. The aim is to set up workshops run by students for senior citizens in nursing homes. The added value of this project is that the students will be paid for their activities, thus helping them to bear the costs of student life. A project linking the well-being of seniors and the intergenerational link.

DON'T WAIT UNTIL NEXT MONTH

This is just a small preview of the On Seniors' Side Foundation!
